## WEIGHTS

FOU COND. LIGHT  
16/22 PT

The "Fou" typeface family was designed as an alternative to "Trade Gothic condensed bold". During the design process of a normally wide font variant a system developed that responds to white space and changing proportions. Thus, round transitions become rectangular and vice versa, space is made and space is taken away. This system and the associated changes are continued on a model with semi-serifs. "Fou" can also be used as an alternative to "Din" or the wider "Q-Type", but in comparison offers more room for emphasis with its italics, expert sets and numerous special characters.

Die Fou Schrift Familie wurde als Alternative zur »Trade Gothic condensed« entworfen. Während des Gestaltungsprozesses einer normal breit laufenden Variante entwickelte sich ein System, das auf Weißräume und die sich ändernden Proportionen reagiert. So werden runde Übergänge eckig und eckige Übergänge rund – es werden Räume geschaffen oder Räume genommen. Die Schrift kann auch als Alternative zur »Din« oder der breitlaufenden »Q-Type« genutzt werden, hat aber im Vergleich mit italic-Schnitten, Kapitälchen und diversen Sonderzeichen mehr Möglichkeiten für Auszeichnungen.
